Level Crossings

PRODUCT PROFILE

Henry Williams Limited have provided engineering excellence within the rail industry, manufacturing signalling equipment since 1883, some of the original products are still manufactured at our Darlington works.

Our portfolio today includes level crossing protection and signalling systems for which we have expertise in the following areas:

- Design
- Project management
- Manufacture
- Installation
- Commissioning
- Continued maintenance

Our level crossings protection systems take the form of standard Network Rail relay interlocking or PLC controlled all of which are configured inline with the HSE guidance for level crossings.
